About Avidity Biosciences

Avidity Biosciences, Inc. is a privately-held biotech company pioneering Antibody-Oligonucleotide Conjugates (AOC™) for treatment of rare muscle disorders and other serious diseases. AOCs combine the tissue selectivity of monoclonal antibodies and the specificity of oligonucleotide-based therapeutics to enable more effective targeting of tissues, such as skeletal muscle, immune cells, and heart to create a pipeline of targeted oligonucleotide therapeutics. The company's lead research program addresses myotonic dystrophy type I, a disease with no approved treatment options. In April 2019, Avidity Biosciences and Eli Lilly announced a strategic partnership to utilize Avidity's AOC technology to pursue therapeutic targets initially focused on immunology and other indications.
